This is to acknowledge that

Tetiana Ivanchenko

Attended a one-hour webinar and Q&A session entitled

Cracking the toughest food matrices with advanced GC column technology

April 21, 2026

Key learning objectives:

- Learn how to improve your lab throughput using the latest GC column technology.
- Uncover GC-MS/MS bottlenecks and optimization tips and tricks.
- Understand how robustness, sensitivity, and column resilience can enhance lab throughput for multi-pesticides analysis by GC triple quad (GC-MS/MS).
